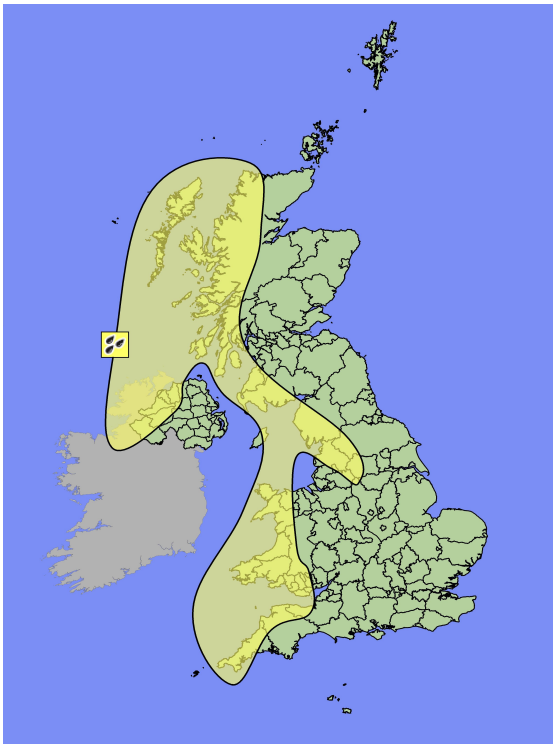
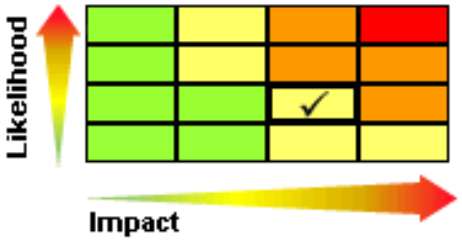
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system moving east then southeastwards across the UK on Wednesday will bring prolonged rain, heavy at times to many western regions. Accumulations of 40 to 60mm rain are possible over high ground in parts of Wales, northwest England, western Scotland and the west of Northern Ireland.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **09:00 on Wed, 04th Jan 2012** until **23:59 on Wed, 04th Jan 2012**

Another spell of wet and windy weather will affect the UK on Wednesday. Heavy rain, accompanied by strong winds, may lead to localised flooding, mainly in the West.
